

THE REPUBLIC OF UGANDA
IN THE HIGH COURT OF UGANDA, HOLDEN AT KAMPALA (CIVIL DIVISION)
HIGH COURT CIVIL SUIT NO. 283 OF 2012

1. NISSI MBABAZI
2. JONATHAN ARUHO
3. MATAYO NATUMANYA
4. KING DAVID TANDEKA

**ALL MINORS SUING THROUGH THEIR NEXT FRIEND
KENNETH KAKURU**

5. GREENWATCH:..... PLAINTIFFS

VERSUS

1. THE ATTORNEY GENERAL
2. THE NATIONAL ENVIRONMENT MANAGEMENT

AUTHORITY:..... DEFENDANTS

PLAINTIFFS' WITNESS STATEMENT

I **Dr. Shuaib Lwasa** of C/o Kakuru & Co. Advocates, Plot 7/9 Second Street Industrial Area, Kinyara Sugar Building first floor suite F-5, P.O. Box 6256 Kampala, do hereby affirm and state as follows:

1. That I am a male adult Ugandan of sound mind and an associate professor at Makerere University Department of Geography, Geo-Informatics and Climatic Sciences School of Forestry, Environment and Geographical Sciences, in the College of Agriculture and Environmental Sciences and swear this statement in my individual capacity.
2. That my graduate background is in geoinformatics, disaster risk management however I have carried out research on global environmental change for the last 20 years. I am not a physical scientist but I have worked closely with the physical scientists. I have also done extensive research in the areas of climate change mitigation and adaptation. **My Curriculum Vitae and a list of my publications is attached and marked Annexure "A".**
3. That I was among the Lead Authors of the Intergovernmental Panel on Climate Change (IPCC) Fifth Assessment Report. The IPCC is the most far-reaching international effort to ensure that authoritative scientific assessments are placed before the international community. In the Fourth Assessment the IPCC concluded that warming of the climate system is unequivocal, as is now evident from observations of increase in global average air and ocean temperatures, widespread melting of snow and ice and rising global average sea level. It further concluded that most of the observed increase in globally-averaged temperatures since mid-20th century is very likely due to the observed increase in anthropogenic Green House Gases (GHG).

4. That the role of the IPCC is to **assess** on a comprehensive objective, open and transparent basis the scientific, technical and socio-economic information relevant to the understanding of climate change, its impacts and future risks and options for adaptation and mitigation. The Lead Authors are selected on the basis of their expertise.
5. That I am currently carrying out three research case studies in Uganda in Buhoma, Kampala and Karamoja. These studies indicate that the temperatures particularly in these regions are getting warmer compared to the previous years. There have been clear signals of the effects of climate change in those areas and across the country we are starting to see evidence of the effects of climate change for example; violent precipitation down pours that are intense, seasonal extreme events, increased frequency of droughts in Palisa and Karamoja, an increased frequency of drought which gives little room for adjustment for the communities to bounce back, extensive flood risk in the country associated with extreme precipitation all the above are associated with climate change.
6. That the government of Uganda has ratified the Paris Agreement, is part of the regional initiative of the Intergovernmental Authority on Development (IGAD), has elevated the Climate Change Unit within the Ministry of Water and Environment to a Department, and created a metrological Authority all in the spirit of strengthening Uganda's implementation of the United Nations Framework on Climate Change (UNFCCC) and its Protocol.
7. That despite the government's initiatives mentioned above, the government has majorly focused on creation of policies, governance systems, strategies and plans for the implementation of adaptation and mitigation measures to curtail the effects of climate change. However, a policy is a guiding framework and not an implementation framework.
8. That the effects of climate change cannot be addressed through governance systems that are top-down, siloed across sectors and focused on short-term funding streams. The effects of climate change are best addressed when government takes a proactive stance on their mandate to address climate change. Government ought to focus on the real needs of climate-affected populations.
9. That in my opinion the government of Uganda has not carried out practical steps on the ground to deal with the impacts of climate change but merely clings and rides on individual, foreign and local organisations' initiatives. The government has left the implementation of adaptation and mitigation measures to international players, civil society organisations and bilateral agreements between local government and international funders. What this creates is a series of project-based implementation plans which are not consistent and thus do not provide long-term benefits to the affected communities.
10. That the latest findings by the United Nations Food and Agricultural Organisation indicate that Uganda losses over 200,000 hectares of forest cover annually and plants less than 7000 hectares annually. Between 1990 and 2005, natural forest estate outside protected area reduced by 35 per cent (from 3.4 million in 1990 to 2,3 million in 2005). People are converting hitherto forested land into agricultural land, timber and charcoal burning zones.

11. That every year Uganda loses hectares of forests. Forests are important because trees absorb carbon dioxide (which is a green house gas) and release oxygen so these forests are our life support system and the government is degazetting forest reserve for other land uses for example parts of Bugoma central reserve forest in Hoima district and Zoka forest reserve in Ajumani District.
12. That my peer-review research over the years has demonstrated that, by increasing green rooftops, improving transportation systems, increasing forestry in urban areas and encouraging urban agriculture to increase local food sources, the urban heat index of a particular city will be reduced, the GHG emissions from transportation will be lowered, and increased forestry practices (including retaining soil) will increase carbon sequestration. It is therefore both feasible and beneficial for the government of Uganda to implement these adaptation initiatives as part of Uganda's national climate change strategy and its commitments under the UNFCCC and the Paris Agreement.
13. That all I have stated herein above is true and correct to the best of my knowledge other than information whose source I have revealed and I swear this witness statement as my personal opinion giving evidence in this suit.

Affirmed at Kampala
by the said **Dr. Shuaib Lwasa**
this^{5th}..... day of
June... 2018

Curriculum Vitae

9/7/2015

Shuaib Lwasa
Associate Professor
Dept. of Geography, Geo-informatics & Climatic Sciences
Makerere University
P.O Box 7062, Kampala (Uganda)
Email: lwasa_s@caes.mak.ac.ug
Website: www.mak.ac.ug/staff/lwasa

CAREER INTERESTS

Dr. Shuaib Lwasa's career interests are in urban geography, spatial planning, landscape ecology, climate change, urban health, adaptation of cities to climate change, and disaster risk reduction, urban sustainability with links to livelihood systems and resilience to climate change. Shuaib publishes research on topics of cities and adaptation to climate change, health impacts of climate change, land and property rights, land use and landscape ecology, resource efficiency and spatial planning for sustainability. Shuaib coordinates the Habitat University (UNI) climate change and disaster Hub at the department of Geography. He also serves on the Science steering committee of Integrated Research on Disaster Risk (IRDR) and the Urbanization and Global Environmental Change (UGEC) of Future Earth. He is an IPCC Lead Author for the Fifth Assessment Report.

EDUCATION

Ph.D. in Urban Geography at Makerere University in 2007,

Masters in Geographic Information Science for Spatial Planning and Urban Management Applications, at ITC Netherlands in 1998,

Masters degree in Land Use Planning and Management at Makerere University in 1995,

Bachelors in Geography at Makerere University in 1995.

PROFESSIONAL EXPERIENCE

January 2015 to date Associate Professor, Department of Geography Geo-Informatics and Climatic Sciences, Makerere University,

January 2012 to 2014 Lecturer, Department of Geography, Geo-Informatics and Climatic Sciences, Makerere University,

February 2011 to 2012. Lecturer, Department of Environmental Management Makerere University,

August 2009 to January 2011, Lecturer, Department of Geography, Makerere University,

This is referred to as
Annexure.....
in the Affidavit of.....
Date.....
Commissioner for Oaths

October 1998 – July 2009 Assistant Lecturer, Part-Time Department of Geography, Makerere University,

September 2006 to August 2009, Regional Research Scientist, International Potato Center, Lima, Peru

PROFESSIONAL MEMBERSHIPS

-  International Development Evaluation Association since 2010
-  African Evaluation Association, since 2011
-  Global Spatial Data Infrastructure Association (GSDI) since 2005
-  International Association for People-Environment Studies (IAPS) since 2004
-  Population Environment Research Network (PERN) since 2004
-  Uganda Evaluation Association since 2007
-  Uganda Institute of Physical Planners since 2007
-  African Association of Remote Sensing of the Environment since 2004

PROFESSIONAL SKILLS

Geospatial analytics
Urban analysis
Spatial planning
Remote sensing analysis

SERVICE

2008-2010: **Coordinator**, Urban and Regional Planning Program Department of Geography, Makerere University, Uganda
20015 to date; Coordinator Graduate Programs, Department of Geography, Makerere University, Uganda
Editorial Review Board Member of International Journal of Applied Geographical Research
Editorial Review Board Member of African Geographical Review
Board Member of the EIS Africa a Network for environmental management

GRANTS

September 2006, Focus Cities Research Program, IDRC, Turning environmental problems into benefits, (US 1,100,000)
April 2012, START Africa climate change program, (US \$ 50,000)
August 2012, NORHED, Higher Education Innovations research, (US \$ 30,000)

CONFERENCES, COURSES AND WORKSHOP ATTENDED

Invited Lectures and Conference Plenary presentations

The Tokyo Conference on International Study for Disaster Risk Reduction and Resilience Ito Hall, The University of Tokyo, Tokyo, Japan 14th - 16th January, 2015; "Inter-Disciplinary Study for Disaster Risk reduction - toward enforcing risk management" from the view point of African countries

United Nations Committee of Experts on Global Geospatial Information Management (UN-GGIM), in collaboration with the National Administration of Surveying, Mapping and Geoinformation of China (NASG), the forum was staged at the NASG China Headquarters in Beijing; "Determining information needs in geospatial information for climate change and disaster mitigation and focused on the issues, lessons learnt and gaps " 22nd – 24th October 2014 <http://www.irdinternational.org/2014/10/28/ggim/>

Nkumba University, 16th October 2013, Commencement Lecture for the 2013 graduating class, The role of a University graduate in handling the gran challenge of climate change

A series of Lectures in Promoting Local Economic Development in CDS as a module for a Diploma in Sustainable Urban Development in Lake Victoria Region for Town Clerks, city administrators and Planners. Organized by IHS, IGS and UN-Habitat between 1st to 5th November 2010

Lwasa S., Institutions and urban governance for sustainability; A Sub-Saharan Africa ViewPoint, International Conference on URBANIZATION AND GLOBAL ENVIRONMENTAL CHANGE: Opportunities & Challenges for Sustainability in an Urbanizing World, ARIZONA STATE UNIVERSITY TEMPE, ARIZONA, USA, OCTOBER 15-17, 2010

A series of Lectures in Environmental Planning and Management as a module for a Diploma in Sustainable Urban Development in Lake Victoria Region for Town Clerks, city administrators and Planners. Organized by HIS, IGS and UN-Habitat between 27th September to 1st October 2010

Lecture at US Embassy in Kampala on High resolution imagery and analysis of urban sprawl in Uganda” under the Global Dialogue and Emerging Science and Technology (GDEST) a US State Department initiative in collaboration with African institutions

Lecture at UN-Habitat on Tool Development for Cities in Climate Change: An evaluation of experiences in Kampala’s CCCI Nairobi, Kenya, 25 to 27 March 2009 Windsor Hotel and Country Club, Nairobi, Kenya

A series of Lectures at the Urban Tools for Climate Change Course at Institute of Housing Studies, Erasmus University, Rotterdam, May 11th to June 3rd 2010
Introduction to climate adaptation: Practical aspects of adaptation linked to some sectors.
Experiences of some cities

Spatial planning/land use: Importance of including climate change issues into spatial planning and land

Disaster Risk Reduction: Linking disaster risk reduction and climate changes

Lectures at the 2010 January Term Course “Ethics, Protocols and Practice of International Research, 1st to 18th January 2010, University of Virginia Charlottesville
